Forecast for Saturday 22 Jun 2024

Weather: A rather cloudy and damp start to the day, with some outbreaks of patchy light rain and drizzle at times, before gradually clearing eastwards during the early hours. A largely fine day with some sunny spells will follow, bringing high UV levels. Cloud increasing again from the west later in the afternoon, becoming extensive down to valley floors on windward ground by dusk, with some light rain or drizzle likely.

Chance of cloud-free hill tops above 600m: 30% at first, rising to 90%. Falling to 20% during the evening.

Low cloud and visibility: Cloud obscuring some tops and routes above 500m first thing, lifting above the summits by mid-morning and into the afternoon. Cloud again lowering to 400m by the evening. Visibility will be poor or very poor in low cloud and drizzle early and late in the day, but generally very good during the daylight hours.
